Our Day Out With Care Team

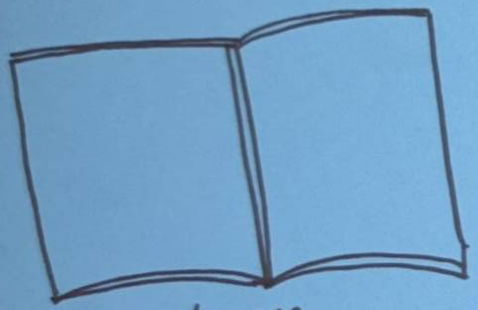

CARE TEAM

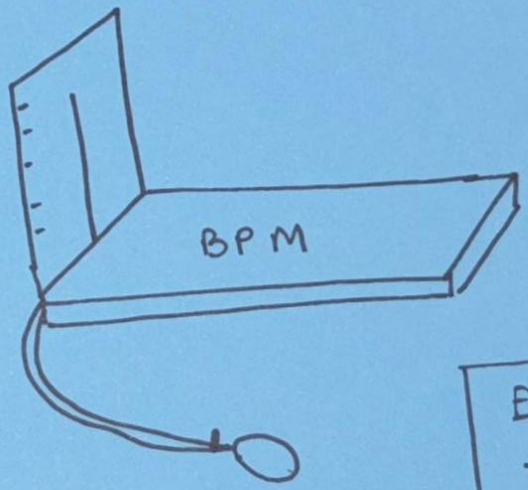

Tablet to put in patient info

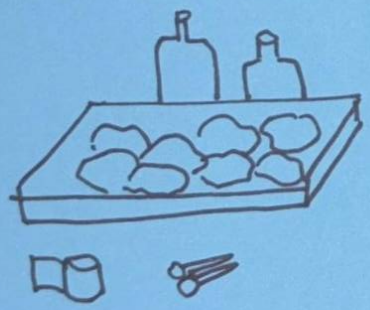

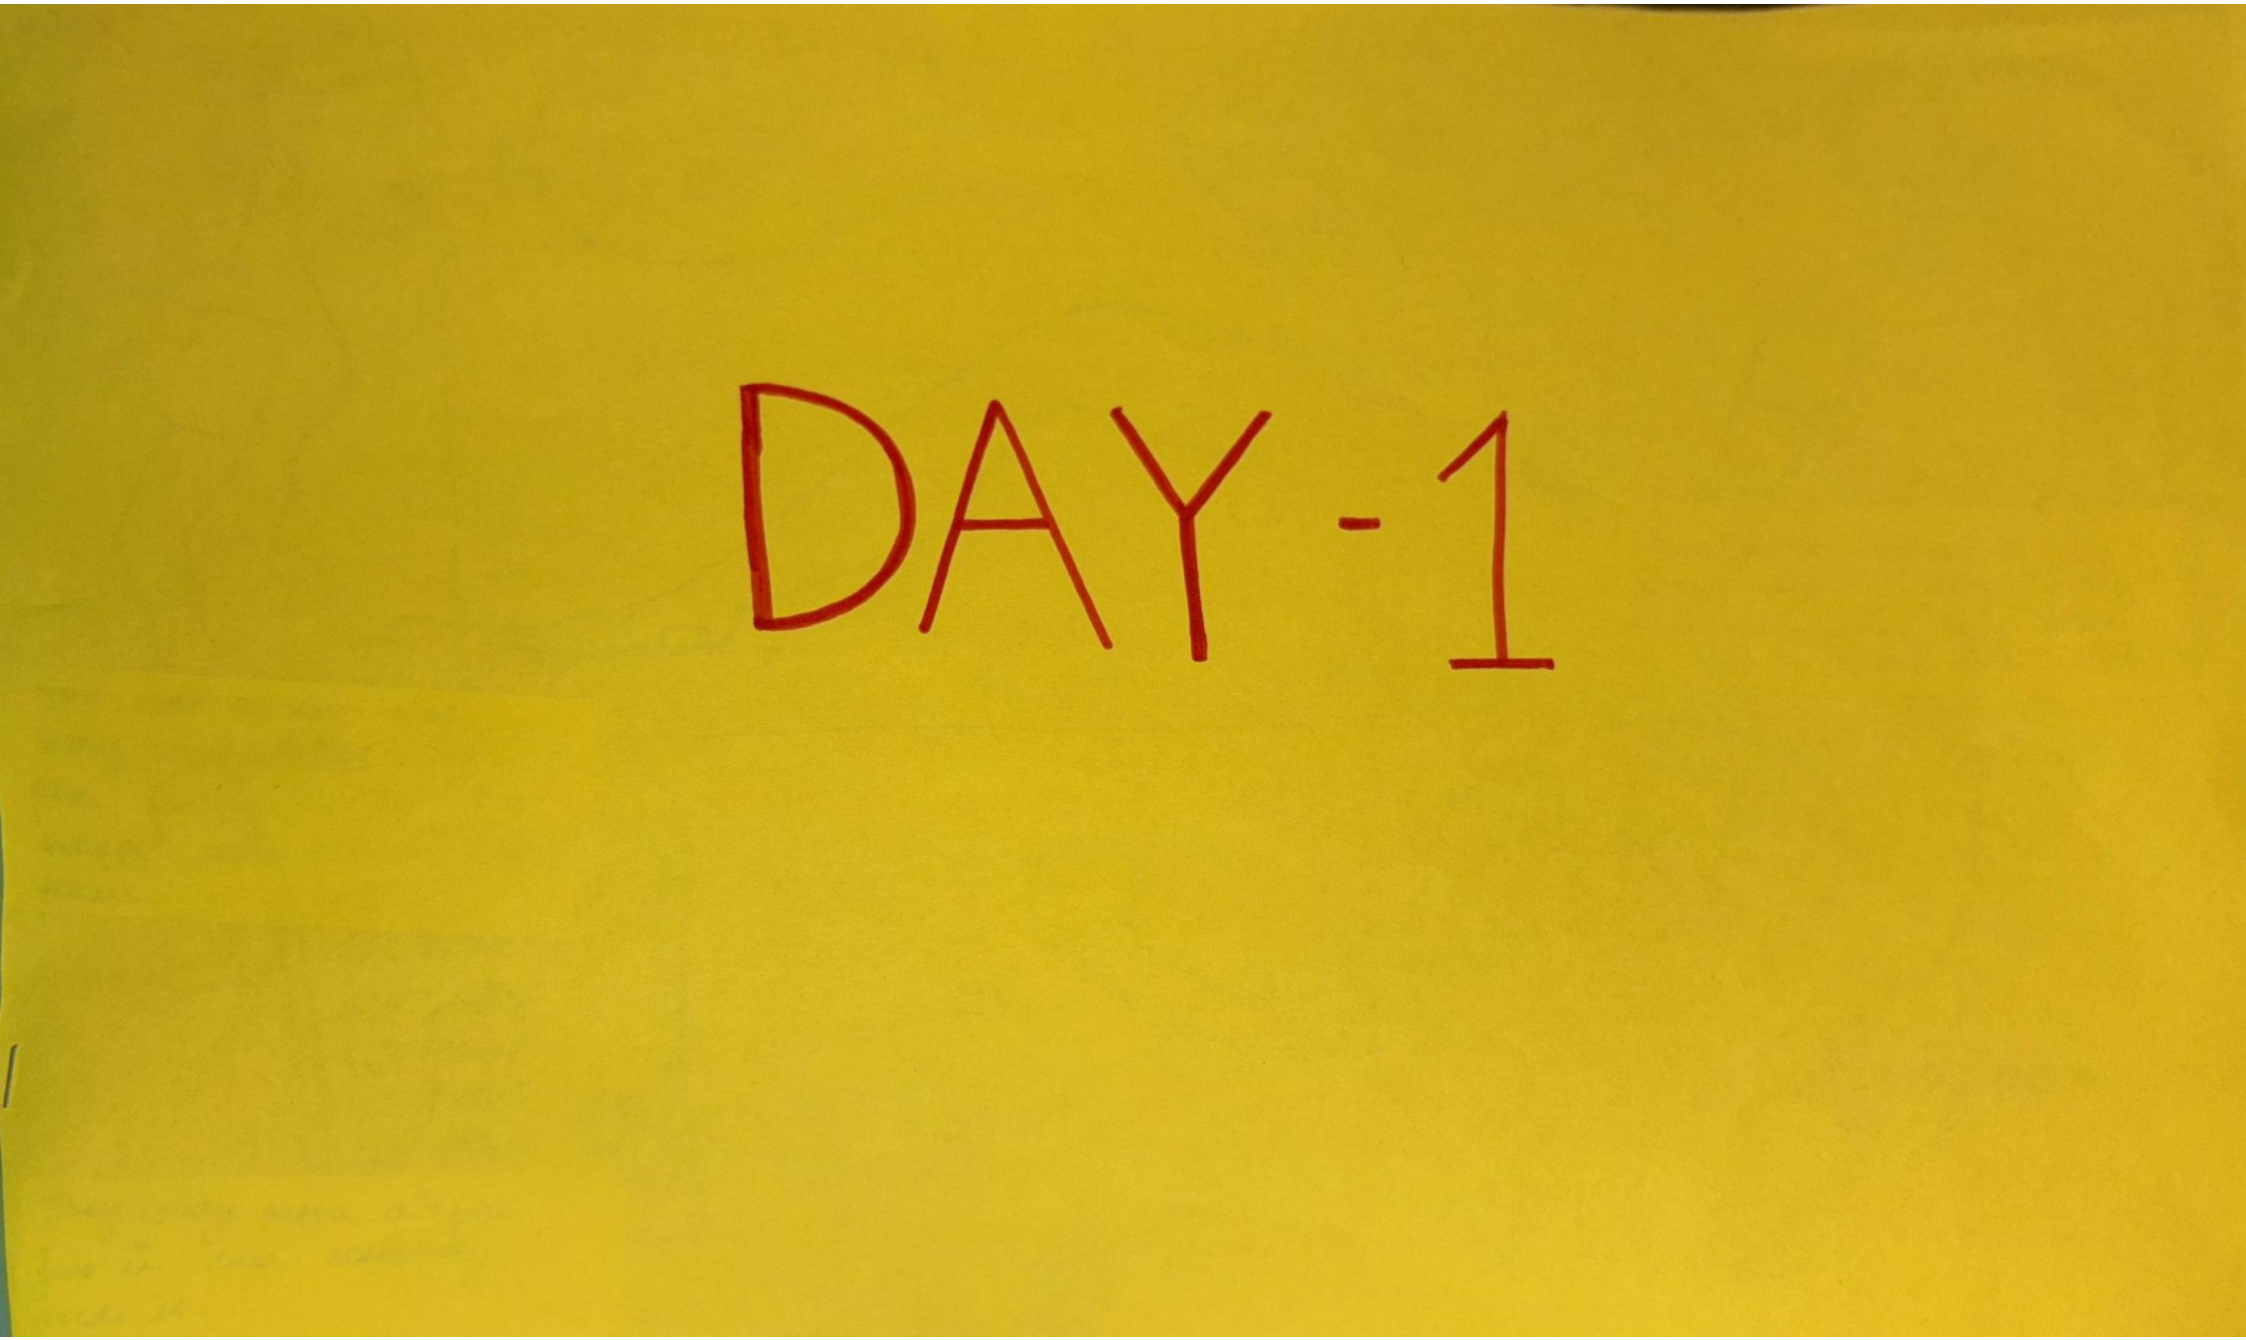

attendance register sign

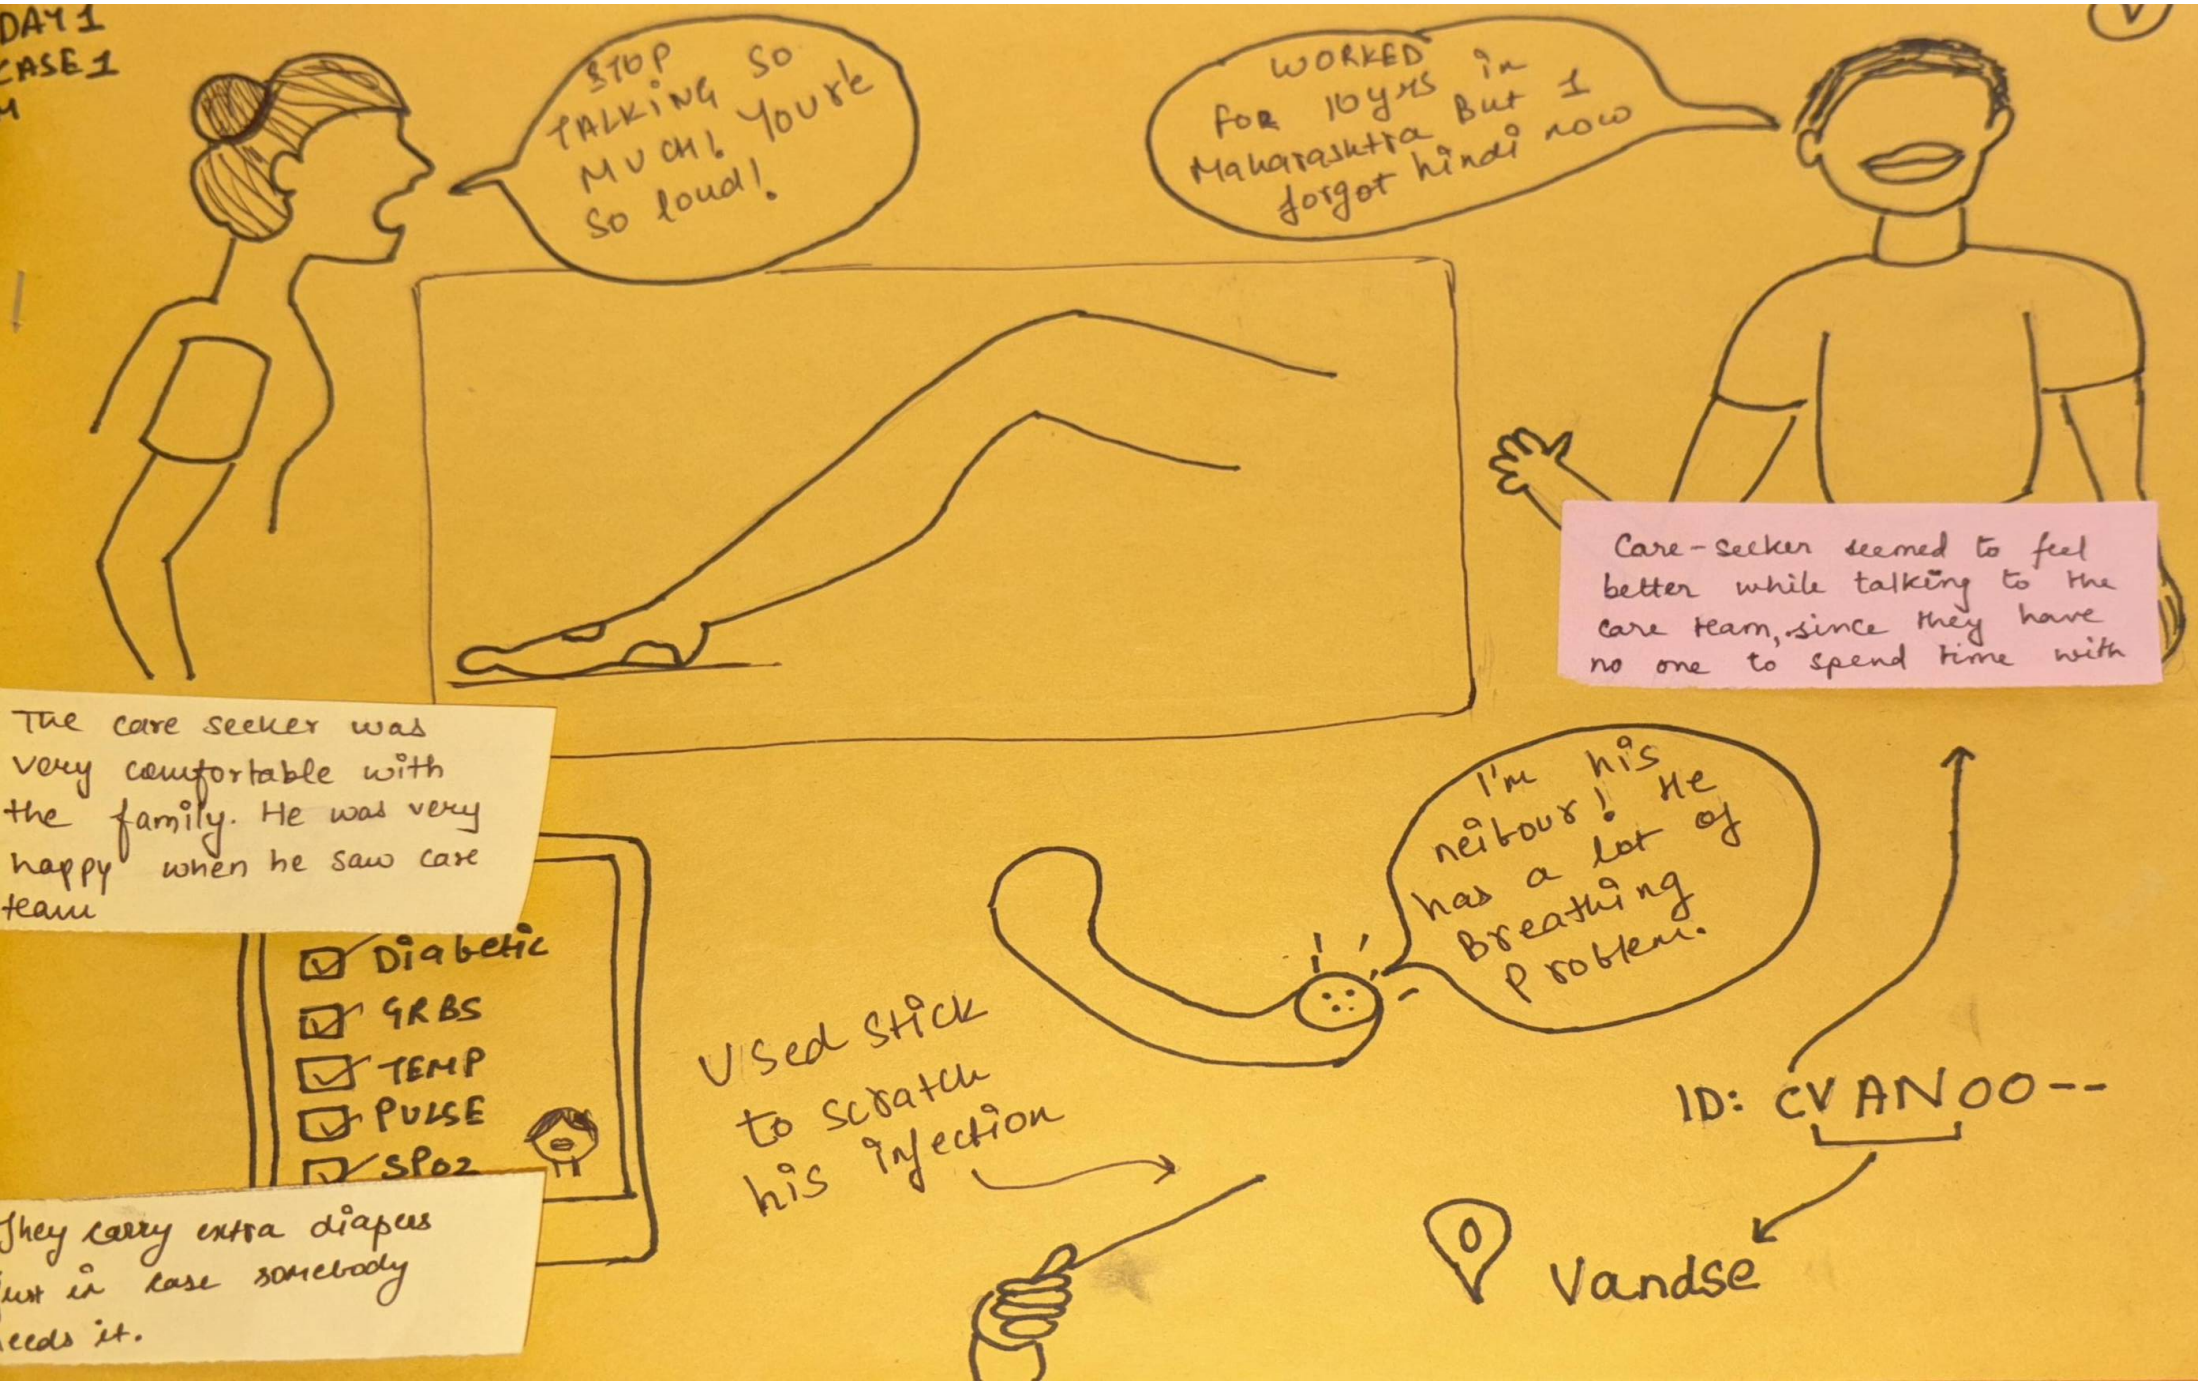

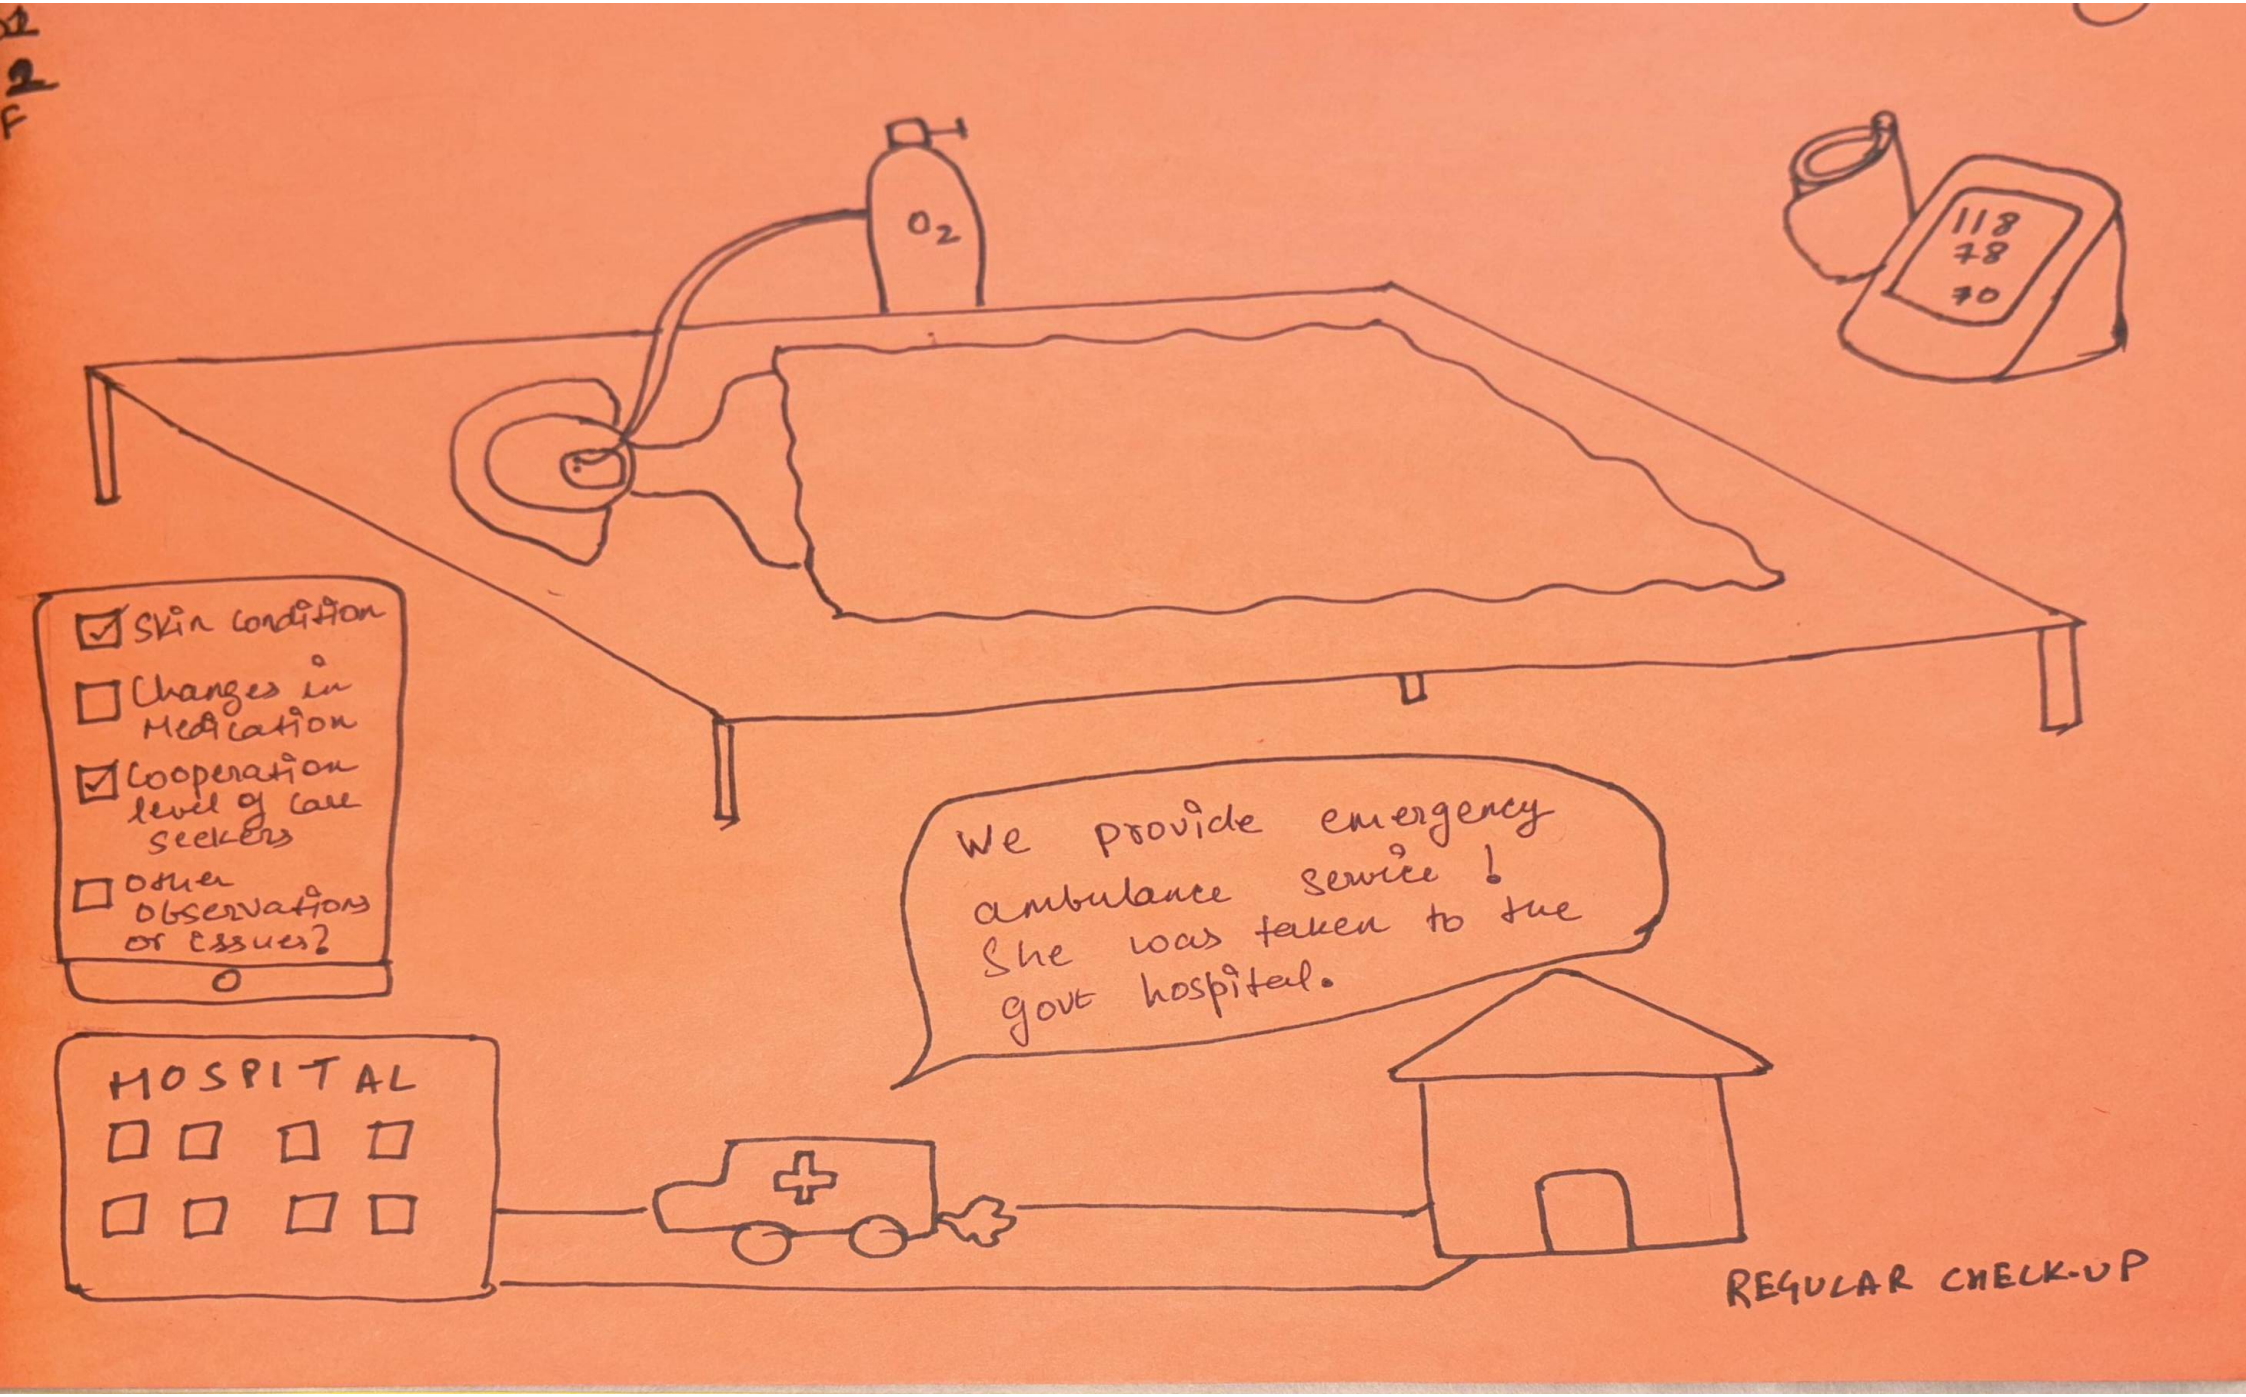

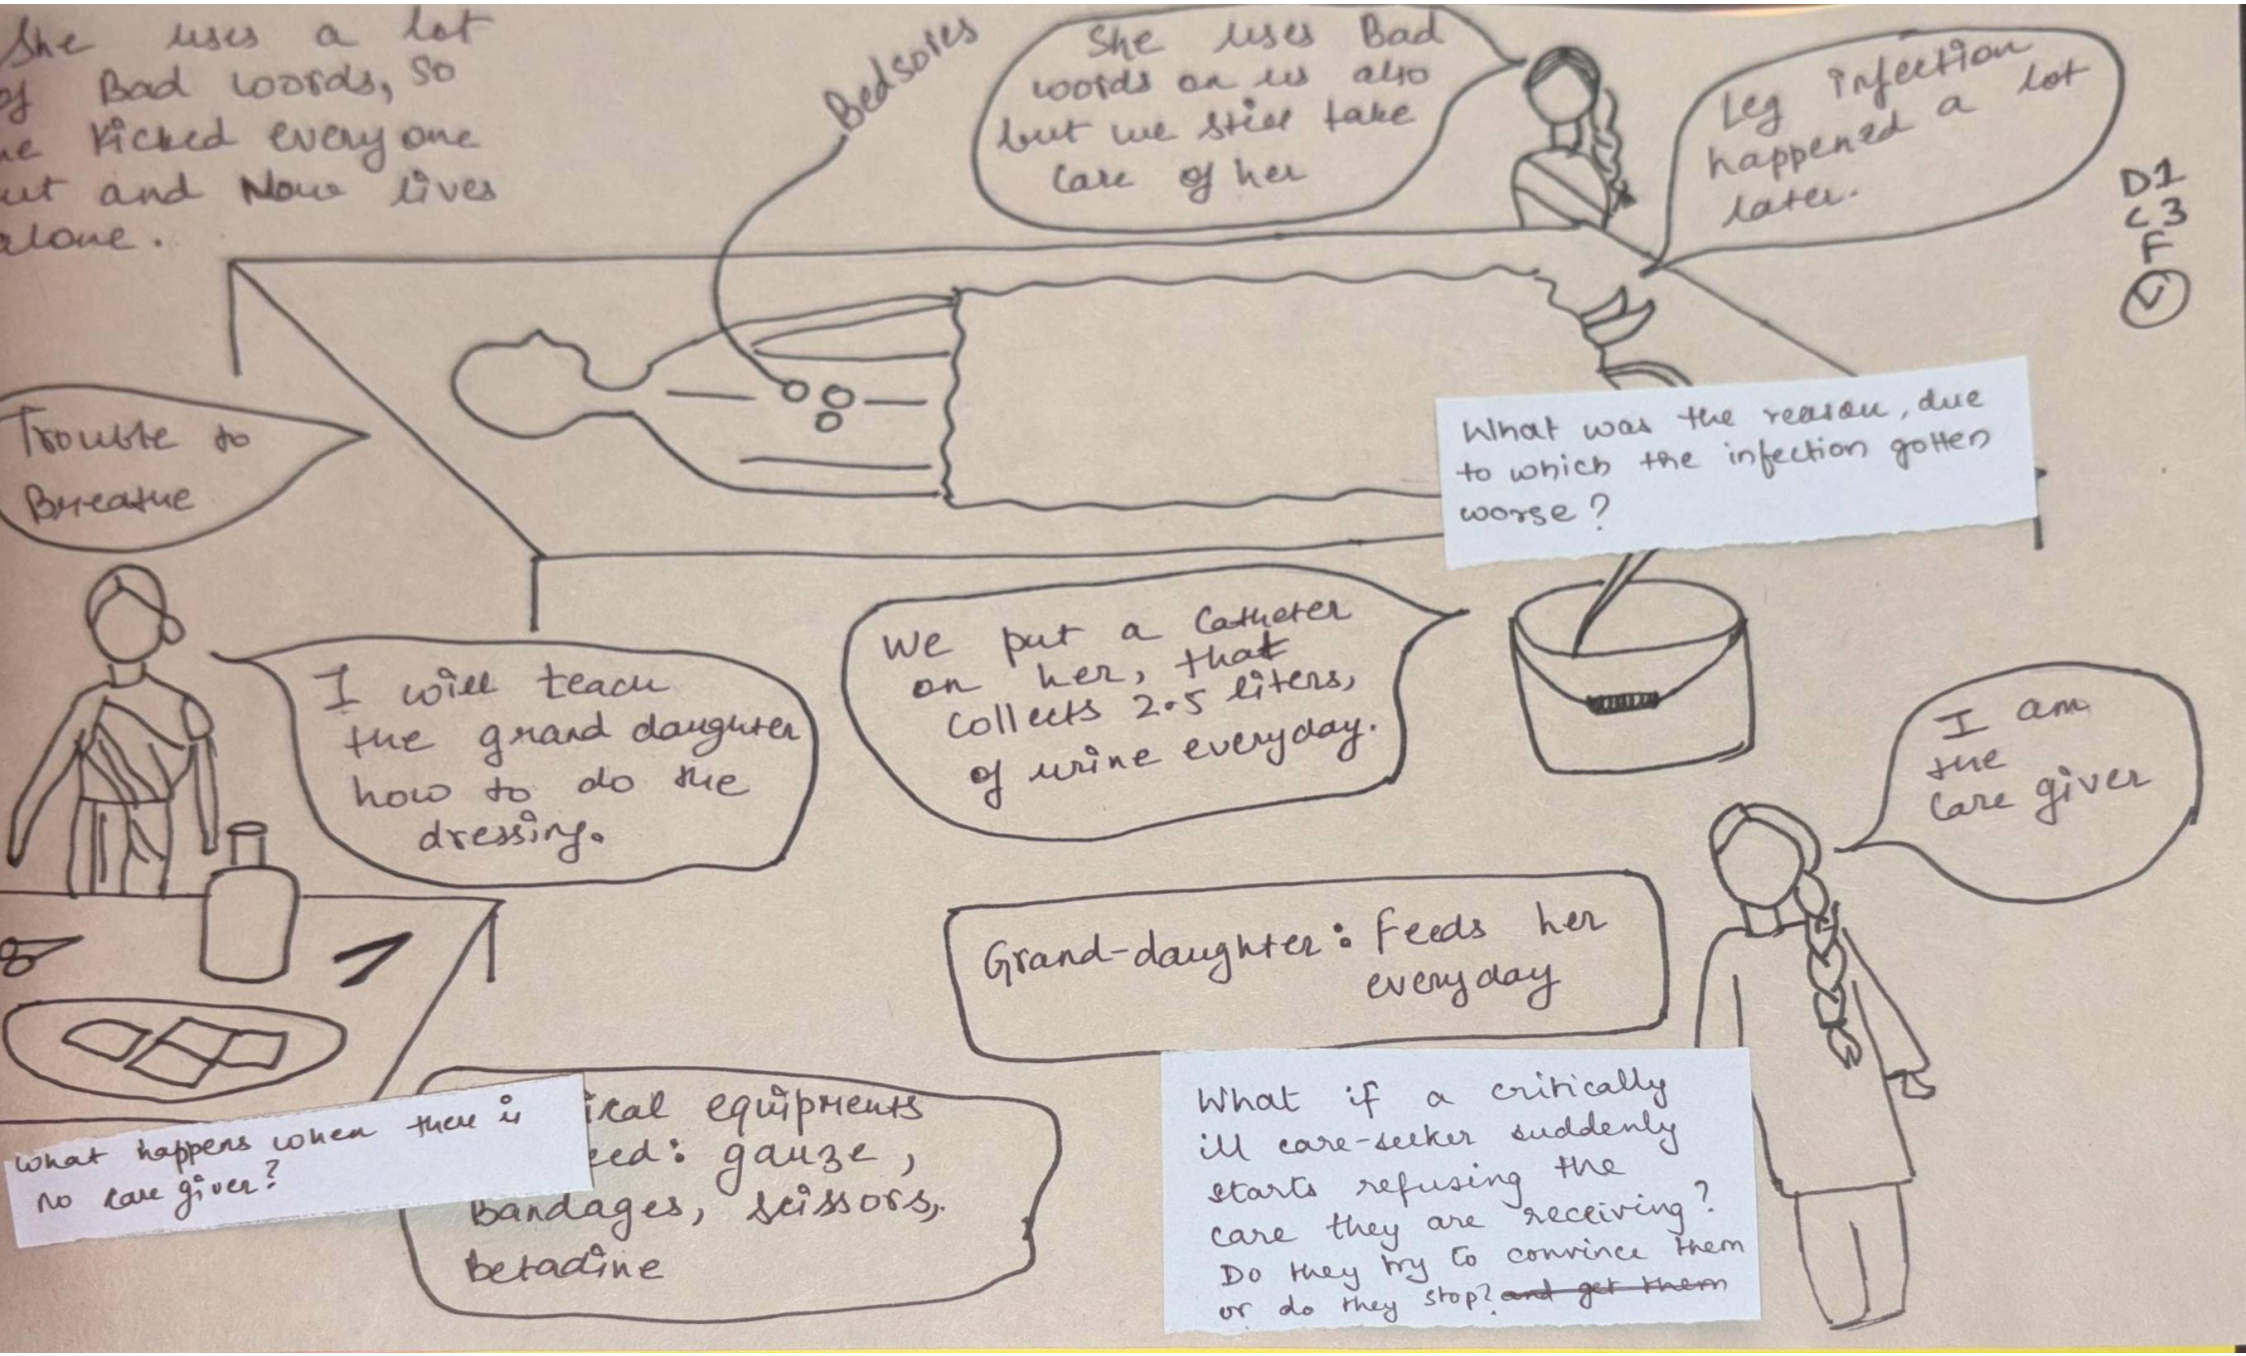

EQUIPMENTS + PREP BEFORE THE VISITS

DAY - 1

DAY 1
CASE 1
4

STOP TALKING SO MUCH! YOU'RE SO LOUD!
WORKED FOR 10 yrs in Maharashtra But I forgot hindi now
Care-seeker seemed to feel better while talking to the care team, since they have no one to spend time with
The care seeker was very comfortable with the family. He was very happy when he saw care team
Diabetic
GRBS
TEMP
PULSE
SPO2
They carry extra diapers just in case somebody needs it.
I'm his neibour! He has a lot of Breathing Problem.
Used stick to scratch his injection

Skin condition
Changes in Medication
Cooperation level of care seekers
other observations or issues?
We provide emergency ambulance sewice ! She was taken to the govt hospital.
HOSPITAL
REGULAR CHECK-UP

She uses a lot of Bad words, So he kicked everyone out and Now lives alone.
Bedsores
She uses Bad words on us also but we still take care of her
Leg infection happened a lot later.
D1 C3 F
Trouble to Breathe
What was the reason, due to which the infection gotten worse?
I will teach the grand daughter how to do the dressing.
We put a catheter on her, that collects 2.5 liters, of urine everyday.
I am the care giver
Grand-daughter: Feeds her everyday
What happens when there is no care giver?
ical equipments ed: gauze, bandages, scissors, betadine
What if a critically ill care-seeker suddenly starts refusing the care they are receiving? Do they try to convince them or do they stop? and get them

I am teaching him how to count. He is schizophrenic and he needs to know basic maths so he can get a job and be independant

Counting with coins was a very creative way of learning

V
D1
C4
M

He was little bit struggling with remembering the counts she learned in last session.

1 Rupee coin

5 rupee coin

Rs 100

2 rupee coin

Divide 1 & 2 rupee coin

Rs 100

Learn addition of all the notes.

I thought the teaching was done for out of good will.

Are there other creative methods of learning that she teaches to the care seekers ?

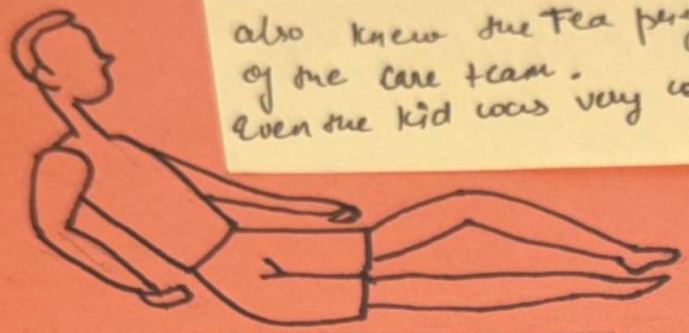

W TO SIT UP FROM
BED

side

The family was very comfortable with the care team, the lady also knew the Tea preference of the care team. Even the kid looks very comfortable.

Physiotherapist said not to use the walker.

Physiotherapy machine to check movements and strength

used coconut oil as an alternative, because physiotherapist did not bring the gel for the machine

What if there is a family who recently moved into town and who do not speak english or kanada?

Staff nurse and physiotherapist Manages the equipment for the following week on Saturday.

(A) D1 C6 M

We need glucose IV fluid.

We don't provide that without doctor's consultation. So you can go to govt. hospital

I am the care-giver. I have already done the dressing in the morning.

n a liquid
iet. But he is
ot eating anything
ow he is not
onscious.

what the care seekers expect from the care team?
→ glucose IV case.

Medical equipments will be provided by the care team next week.

DAY-2

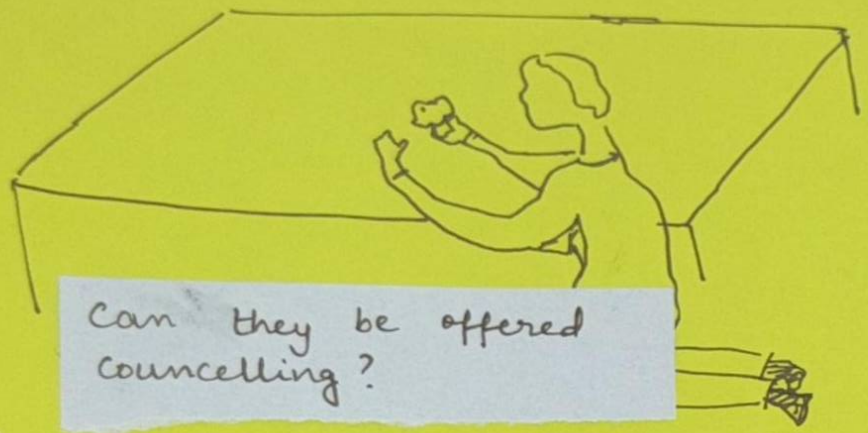

D2
C1
F

Ⓗakkadi

Some Pregnant women were also effected by Endosulfan Hence, we assume, that is how she got effected.

14 years old girl Endosulfan victim by birth

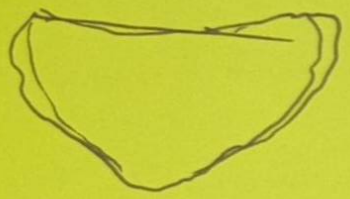

We Provide diapers for her periods. There's nothing else we can do for her

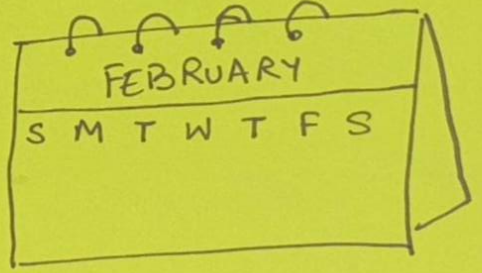

Development delay Not responding to calls, cant speak

She doesn't know what she is doing

Can they be offered councelling?

We keep a track of her periods and provide diapers every month

* Endosulfan affects:

< 50% → okayish response

>= 50% → no response at all

when they are not around ↓ the grandmothers were worried what then / who will take care of her? any more!

What can the future of these care scenerios look like?

C2
M

(H)

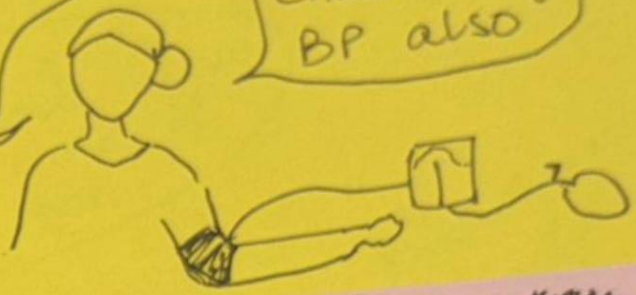

Last stage Cancer

We can't give him radiation, chemo or any other treatment

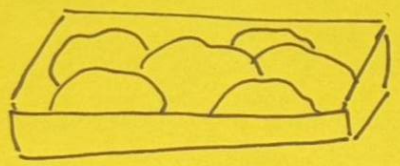

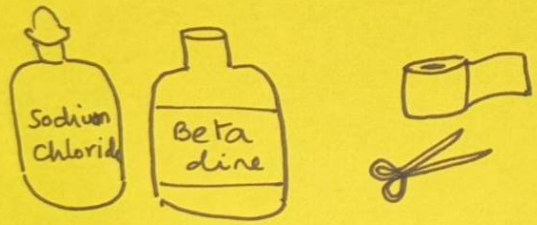

I'm his wife, not a care-seeker but for my ~~care~~ comfort, please check my BP

Check my BP also

As the BP Machine was there already, the care seeker's wife also asked to get her BP checked! (Trust Building)

His son does the dressing when we are not here.

Bandages

Buccal Mucosa

He is not comfortable with going out at all, mostly stays at home

MINOR STROKE → Facial Palsy → Frozen Shoulder

Step 2

Exercises for the arm and shoulder

Step 1

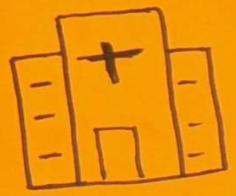

Physiotherapy

Exercises will be done according to their comfort, interests, and limit

Hospital visit 2 yrs. ago

{ diagnosed }

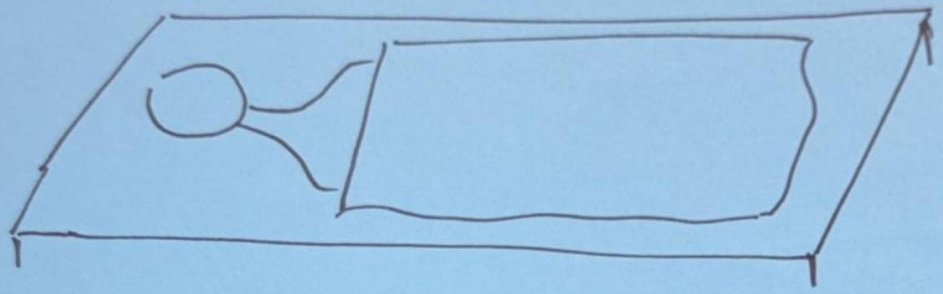

(H)

schedule for visits decided by care team

got patient details

ASHA worker

We categorize based on the type of care they need.

Restorative Care (physiotherapy)

Preventive Care (Bedbound, Bed sores)

Supportive Care (psychological, emotional care)

Care Panel

To get doctor's consultation

1st NA form

Patient info :
Symptoms :
Doctor's reports :
Medical records :

Care team

Lets them know

(H)

Lung Cancer

Financially stable but family does not know how to take care or reduce swollen hands and legs, because of which she got bedridden.

Care seeker was taught exercises and care giver was taught to do the dressing by the care team.

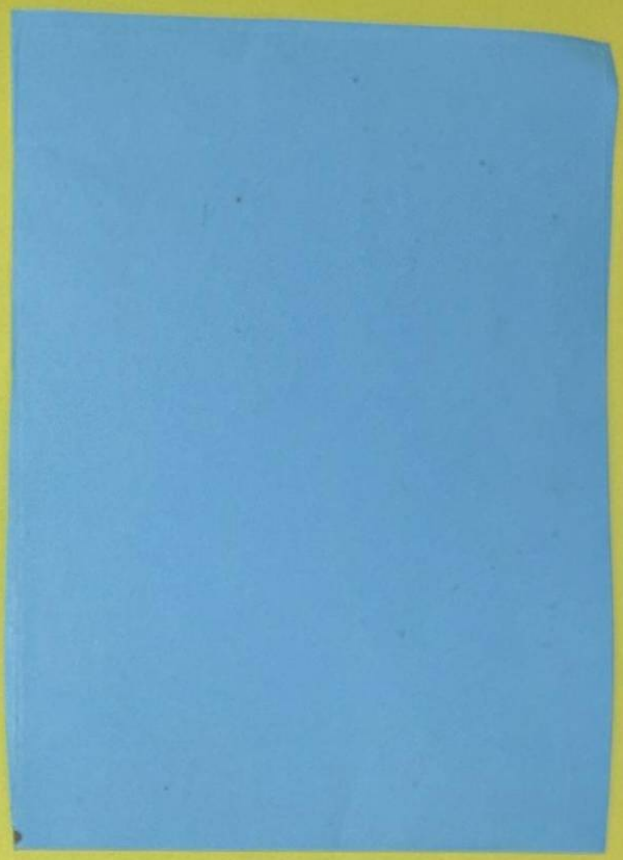

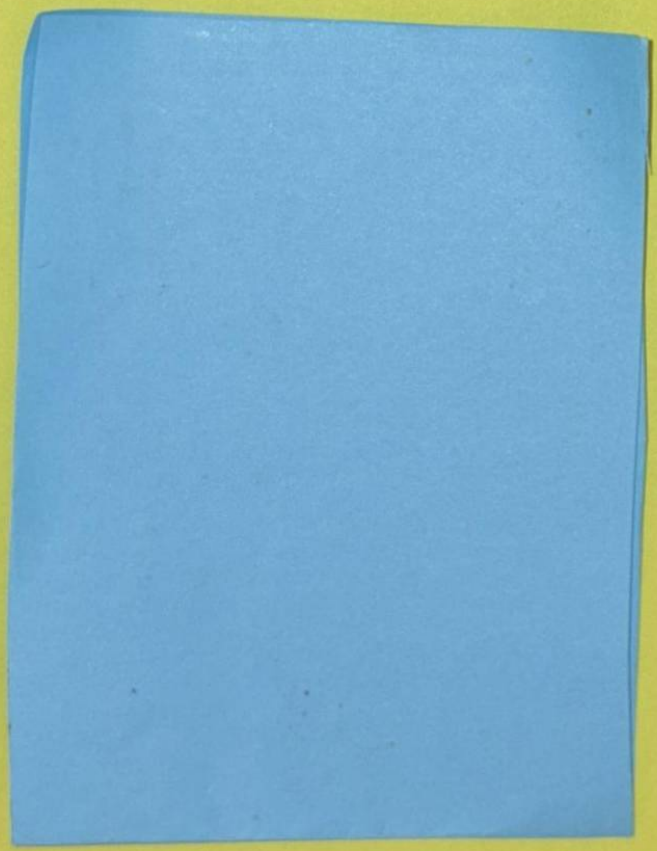

Swelling of hands and legs

Got better in 1 week and started walking again with the help of physiotherapy

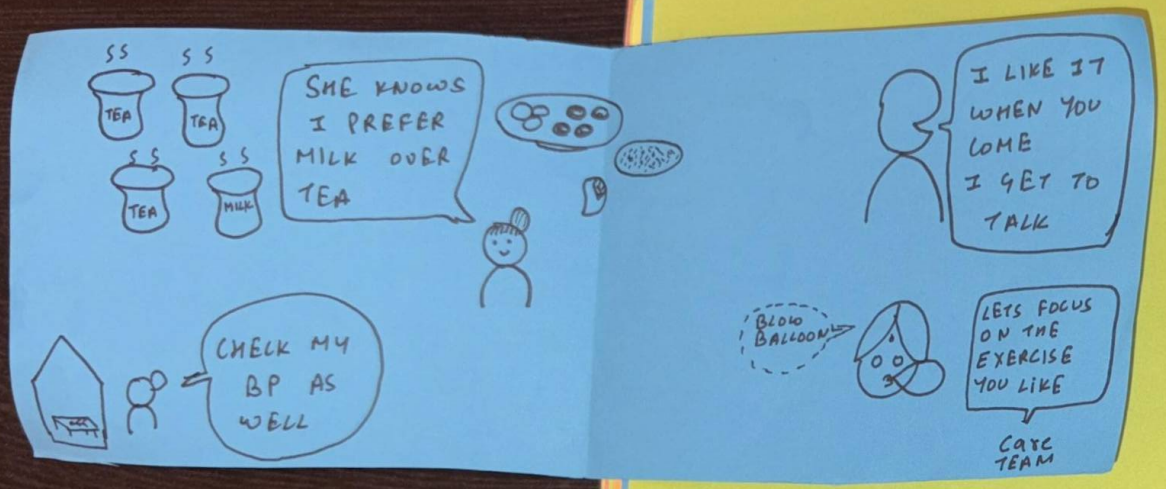

WHAT WE FOUND INTERESTING

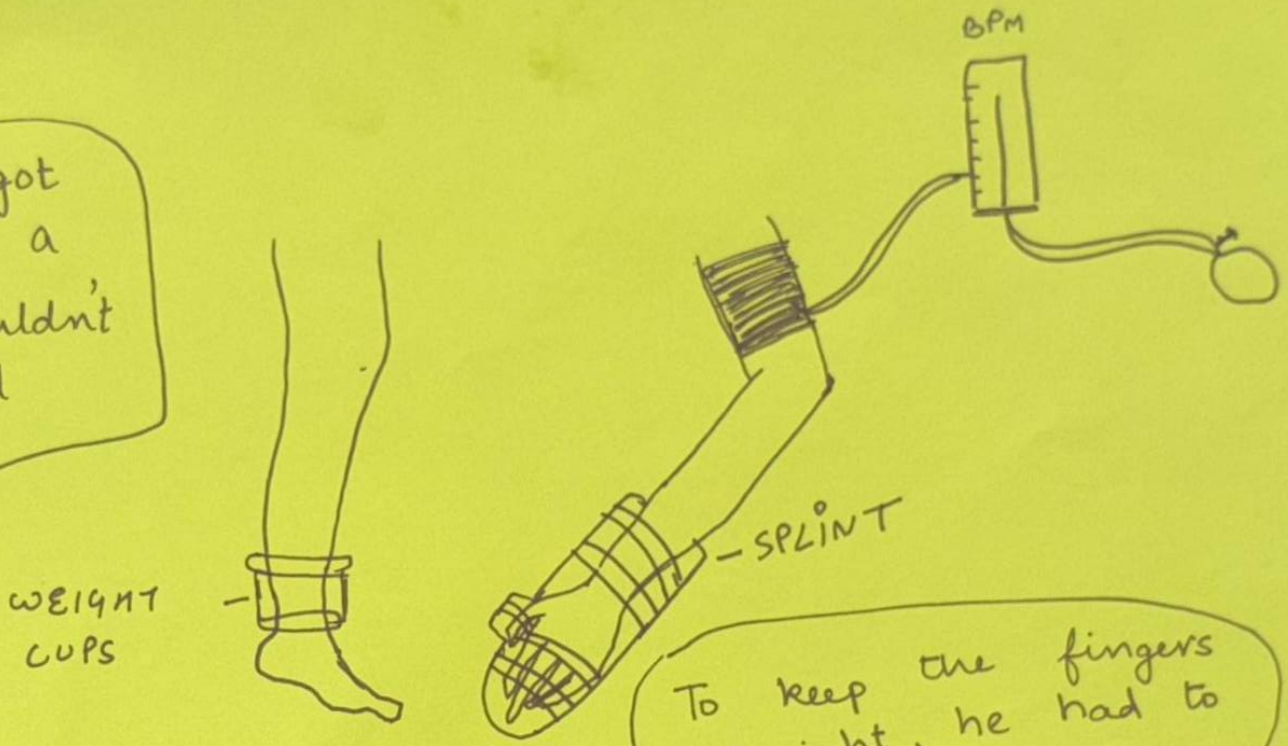

TAKEAWAYS FROM CONVERSATIONS

TEA
TEA
TEA
MILK
SHE KNOWS I PREFER MILK OVER TEA
CHECK MY BP AS WELL
I LIKE IT WHEN YOU COME I GET TO TALK
BLOOD BALLOON
LETS FOCUS ON THE EXERCISE YOU LIKE
CARE TEAM

I feel ashamed to tell my "illness"
"OUR FOCUS IS PEOPLE"
CARE TEAM
mostly populated by elderly people
I feel more comfortable because the care team comes to my home
my partner is ill, I don't know how to take care of them

(H)

Care-seeker got a stroke. As a result, he couldn't use his hand and leg.

To keep the fingers straight, he had to put on a splint.

Physiotherapist helped care-seeker to walk down the stairs with weighted cups
